

Reasonable Suspicion Supervisor Training Program

Program Overview:

Every organization with safety-sensitive positions, whether US DOT regulated or not, needs supervisors, lead hands, and front-line managers who are able to appropriately and effectively identify possible impairment on the job.

Employee drug and alcohol testing cannot be performed based on a mere hunch. *Reasonable Suspicion Supervisor Training* delivers the necessary tools and skills to recognize and appropriately handle employees exhibiting signs of impairment.

This 2.5-hour course will prepare supervisors for determining whether or not reasonable suspicion exists and what to do when they suspect it. This course meets both COAA (Canadian Model) and U.S. Department of Transportation requirements for Supervisor Training.

PROGRAM OUTLINE

- Applicable Legislation and Industry Standards
- Drugs & Their Effects
- Recognizing Impairment in the Workplace
- Managing Reasonable Suspicion Situations
- Reasonable Suspicion and Post-Accident Testing Protocols
